

Dear Applicant;

Qualitative Analysis team has been serving online for a short time. Until this year, we mostly worked with the reference system. However, team members have at least 19 years of field experience. Our team supports companies, academics, students and others in qualitative (verbal) and quantitative (numerical) analysis. Since 2010, our support for qualitative analysis has intensified and continued with quantitative and experimental analysis.

Each member of our team is loyal to the service and principles of our company. People who want to join our team are expected to have the ability to analyse verbal and numerical data and interpret in English and French.

Regardless of the field, we need experts who think that they can serve in verbal and numerical analysis, and have strong analysis and synthesis skills. The software used by our team in verbal and numerical analysis varies. Nvivo program is used for verbal analysis and SPSS and AMOS are used frequently for numerical analysis. Maxqda, Atlas.ti and similar verbal analysis programs and Stata, eViews, Promethée and similar numerical analysis programs are also used.

1. Job Description:

As a company, we serve our customers in the fields defined on the website. We divided these fields into four categories. Details of service areas are as follows:

Within this framework, support is provided for prospective processes, case studies, retrospective processes, sampling, observation and other related methods.

Preliminary processes such as data preparation, electronic recording and analysis are followed by statistical analysis processes. In this context, descriptive analysis, as well as relationship and difference analysis with parametric or non-parametric methods, diagnostic tests, logistic analysis, power analysis, cox regression and the like are carried out according to the distribution of data.

5. Experimental process design, data analysis and reporting in line with the request of the researcher, the whole or partial contribution from the beginning of the process is provided. Professional support is offered in experimental process design, data analysis and reporting.

1.2.FIELD TWO: Reporting Services

1. Analyzing the annual and periodical activities of public and private companies in terms of content and application dimensions and reporting them in detail.
2. Qualitative and quantitative analyzes of the data collected by academic staff in scientific studies are made and reported to facilitate the interpretation by academician.
3. Analyzes of the data gathered at the master's and doctoral level are made and the student is helped to present complementary corrections.

1.3.FIELD THREE: Typesetting, graphic and proofing services for drafts

Our expert assistant staff, who have many years of experience in graphics, typesetting fields, are provided with typesetting, graphics and correction services for your studies.

1.4.FIELD FOUR: Professional presentations with national and international references

1. For private companies, academicians, undergraduate and graduate students,
2. Purchased premium powerpoint presentation drafts;
3. Visualization of annual reports,
4. Preparing oral presentations in congresses, symposiums and other academic meetings,
5. Thesis defenses, homework presentations
6. In line with the selective demand of our customers, premium drafts are prepared in three different categories such as visuality, content and time.

2. Conditions:

2.1.Job conditions:

Our company does not object to the work of experts in our team outside the institution. However, except for works directed by the institution; it is not appropriate for our specialists to communicate directly with customers. The workflow in our company is as follows:

Academic & Corporate Analysis Consulting Services

+44 7448 491463

1. In the first stage, customers contact the corporate contact & technical person or secretary,
2. In the second stage, the technical personnel examine the details of the study and decide in two ways, depending on the situation:
 - a. Based on his/her experience, offers the customer an offer
 - b. Reaches the most appropriate expert on the calendar and asks for his / her opinions about the study. Prepares a proposal for the customer in accordance with the recommendations of the expert.
 - c. After agreement with the customer, the work is directed to the relevant expert.
 - d. The expert takes the documents in the study and starts processing them (preliminary examination, data classification, grouping, analysing etc.)
 - e. Our expert sets a timetable for the work, or presents his opinion on the timetable set which is already set.
 - f. A mini sample of the part prepared in the study is sent according to the customer's request.
3. Our expert sends the finished work to the technical personnel or secretary of our company.

2.2.Payment

In our company, 60% - 40% rule is applied. 60% of the work-related wage is transferred to the specialist and 40% to the company's account. For example, 600euros of a 1000 euro project is transferred to the expert.

Payments are transferred to the expert's account immediately upon delivery of the work to the customer.

3. Conclusion

All the conditions of our company described here are expert friendly. If you have questions in addition to the conditions in this text, do not hesitate to ask in detail. After reading this text, you will be included in our expert staff with the intention message you will send to us. Following the letter of intent from you, the dates that you are eligible for work will be recorded in the company work calendar.

Please indicate in detail in your letter of intent your areas of expertise and which of the service areas described in the text you can contribute.
